LETTER OF RECOMMENDATION

To Whom It May Concern

Premium Bank ASC is pleased to confirm its cooperation with FOMINOV CONSULTING LLC in the implementation of a cybersecurity solution based on A10 Networks Defend Mitigator 1060S, designed to provide advanced protection against DDoS attacks with a capacity of up to 5 Gbit/s.

FOMINOV CONSULTING was responsible for the supply, deployment, configuration, and commissioning of the A10 Networks solution within our IT infrastructure. The project was executed as part of our ongoing efforts to strengthen network resilience and ensure uninterrupted availability of critical banking services.

During the implementation, the FOMINOV CONSULTING team demonstrated strong technical expertise in network security and traffic mitigation technologies, as well as a high level of professionalism in project execution and coordination.

The deployed solution significantly improved Premium Bank's ability to detect and mitigate distributed denial-of-service (DDoS) attacks, ensuring higher availability and stability of external-facing services and digital banking platforms.

We particularly appreciate the team's efficiency, technical competence, and structured approach to implementation, which allowed the project to be completed successfully and in line with the agreed requirements.

Based on our experience, we confidently recommend FOMINOV CONSULTING LLC as a reliable system integrator and trusted partner in the field of cybersecurity and network infrastructure projects, particularly in the area of DDoS protection and advanced traffic management solutions.

Should you require any further information, please feel free to contact us.

Sincerely,

Chairman of the Management Board

Bakhshaliyev Farhad
