LETTER OF RECOMMENDATION

To Whom It May Concern

Premium Bank ASC is pleased to confirm our successful cooperation with FOMINOV CONSULTING LLC in the implementation of a comprehensive cybersecurity project based on Fortinet technologies, including FortiWeb-600F, FortiAnalyzer-810G, FortiAuthenticator VM, and FortiNAC.

FOMINOV CONSULTING was responsible for the design, delivery, deployment, and configuration of the integrated security solution, which was implemented as part of the bank's strategy to strengthen its cybersecurity posture and improve centralized visibility and control over its IT infrastructure.

Throughout the project, FOMINOV CONSULTING demonstrated a high level of technical expertise in enterprise security architecture, including web application protection, identity and access management, network access control, and security event monitoring and analytics.

The implemented solution enabled Premium Bank to significantly enhance its security capabilities, including improved protection of critical applications, strengthened authentication mechanisms, and better control over network access across the organization.

We particularly appreciate FOMINOV CONSULTING's professional approach, strong technical competence, and ability to deliver complex multi-component cybersecurity projects within agreed timelines and requirements. The team ensured smooth integration of all Fortinet components into the existing infrastructure with minimal operational impact.

Based on our experience, we confidently recommend FOMINOV CONSULTING LLC as a reliable and highly qualified system integrator with strong expertise in Fortinet security solutions and enterprise cybersecurity implementations.

Should you require any additional information, please feel free to contact us.

Sincerely,

Chairman of the Management Board

Bakhshaliyev Farhad
